A red Hurom H-AA Series juicer is shown against a dark red background. The juicer has a control panel with several buttons and a digital display. A glass of juice is visible on the left side of the juicer. The text "H-AA SERIES" is overlaid in white on the juicer's body.

H-AA SERIES

HUROM™

**At 43 revolutions per minute,
HUROM captures natural health**

With its world-class, patented Slow Squeezing Technology,
Hurom creates juices that retain all the fresh nutrients straight from nature.
Homemade quality, fit to your taste.

COMPACT & SLIM design with the Curve of Innovation

With a streamlined design that includes smooth curves and gradually becomes slimmer in the back, HUROM brings you stylish, yet modern and innovative beauty.

The wavy curves on the lower body further highlight the design and add perfection as an interior home appliance.

HUROM

Introducing the newest **Alpha Chamber**

Ultem Screw

Squeezes nature's nutrients straight into juice.

17 rpm Spinning Brush

At just 17rpm, slowly rotates to mix ingredients and keep the most nutrients in juices.

No blockage while putting in ingredients!

Reduces pulp inside the chamber with pulp expelling effortlessly! Quieter and smoother operation.

Enhanced structure and convenient cleaning

*New accessory, Ice-cream strainer

HUROM

H-AA, made for user convenience

Semi-Transparent Hopper

Watch your ingredients from start to finish. Not only does the translucent hopper allow us to visually check whether ingredients are getting stuck or being processed smoothly, but also adds a fun element when juicing together with children.

HUROM

H-AA, made for user convenience

No blockage while putting ingredients!

You can extract juice without clogging by smoothly adding ingredients.

With an even quieter and smoother operation, remaining residue inside the chamber is reduced while enabling easy opening of the hopper.

HUROM

H-AA, made for user convenience

No blockage while releasing pulp Convenient cleaning

Outlet pressure is dispersed to increase the power to discharge remaining residue inside the Chamber. More convenient to clean with an open top outlet.

HUROM

H-AA, made for user convenience

**A little more slowly,
Extraction to minimize loss of nutrients**

A spinning brush that slowly rotates at 17 RPM to mix juice and prevent it from overflowing outside the chamber.

HUROM

H-AA, made for user convenience

COOLING AIR VENT

Minimized motor heat with a low-speed motor that slowly rotates.
Air vent that helps cool down the motor to ensure safe usage when extracting juice.

HUROM

H-AA, made for user convenience

EASY-MOVING HANDLE

The curves on both sides of the bottom highlight the exterior of the body and have a functional role beyond design.

A body that is even more convenient and easy to move by placing fingers on both grooves and lifting up.

HUROM

HUROM TECHNOLOGY

Hurom is the First and the Best

At 43rpm, keeps nutrients intact with Hurom's slow squeezing technology

The robust Ultem Squeezing Screw, Hurom's core component, uses slow squeezing technology to make natural and healthy juice

The control lever allows for maximum extraction of core nutrients from seeds and peels, giving Hurom juice a high nutritional value

The 4-winged Spinning Brush rotates between the strainer and chamber blending the juice as it is being made

The juice cap helps to mix of ingredients within the chamber, as well as aid in easy-cleaning after juicing

The hopper is designed for optimized stability and safety for users

A set of the Fine Strainer for juice and the Ice Cream Strainer for desserts, to be used according to preference

The Safety Sensor makes sure the machine operates only when the chamber is accurately assembled

The AC motor with high energy efficiency minimizes noise and vibration

Efficient energy consumption, 150W
Electricity Down! Nutrition Up!
(Blender & High speed juicer's electric energy consumption range between 800~1300W)

Convenient accessory

Homemade natural Ice cream with the HURROM

Easily make natural, homemade desserts
with no artificial additives, all by yourself.

NO SUGAR, NO ADDITIVES

Harm Free, BPA Free, Eco-friendly, Hurom

Tritan Chamber
BPA Free Plastic, Tritan
It is not manufactured with bisphenol A(BPA) or other bisphenols, such as BPS.

Ultem + Stainless steel strainer
Bacteria Free Using Stainless
Durable and Harm Free Ultem

POM Brush holder
Silicone Brush
Chemical resistance, friction &
wear resistance
Usually used in Thermos and Toys.

PEI [Ultem] Ultem Squeezing Screw
Outstanding elevated thermal resistance,
high strength and stiffness, and broad
chemical resistance

H-AA SERIES

Specification

Chamber Type	Alpha Chamber (Lever Type, Cap)
Chamber Capacity	500ml
RPM	Squeezing Screw 43rpm Spinning Brush 17rpm
Materials	Body : ABS Chamber : Tritan Squeezing Screw : PEI(ULTEM) Fine Strainer : Stainless steel/PEI(ULTEM) Ice cream strainer : BISEN Hopper : ABS
Size	179.7(W) x 223(D) x 407.4(H) mm
Weight	4.8kg (Body: 3.46kg, Chamber : 1.34kg)
Motor	A/C
Voltage, Hz, Power consumption	100~230V, 50~60Hz, 150W
Cord Length	1.4M
Standard usage	Up to 30 minutes continuously
